

## **HeathCo® Launches Next Evolution of Heath®/Zenith Motion Activated Security Lighting**

Bowling Green, KY - October 11, 2010 - Introducing the next evolution in motion-activated security lighting, the 5910 series LED light from Heath/Zenith. By coupling the savings of motion-activation with the efficiency of LEDs, the 5910 series delivers energy saving of over 95 percent compared to dusk-to-dawn lighting. Designed to replace a 75W halogen fixture, the two independently aimable heads provide uniform light distribution.

Heath/Zenith is also a proud participant in the U.S. DOE Lighting Facts(CM) program, which measures the standard of quality for LED lighting. The SL-5910 received a color rendering index (CRI) of 70, and a correlated color temperature (CCT) of 5100 Kelvin.
